Today's Skill: Coding

Why and How?

- So far we have been using pre-made code. Today we will examine that code and assess how it works.

Functions of Coding

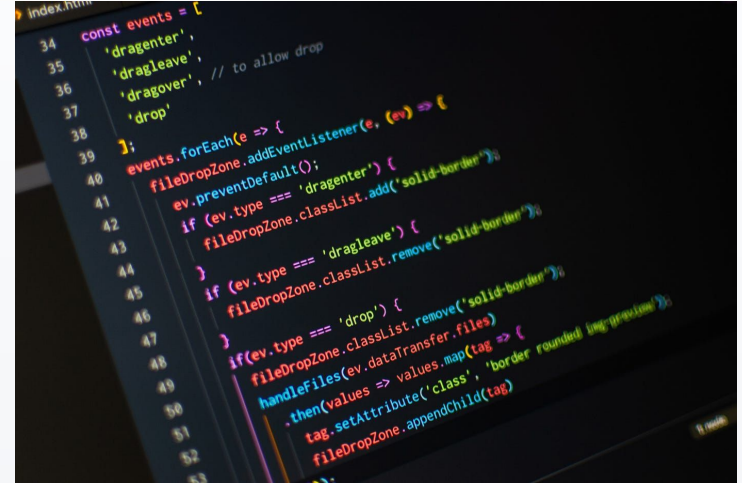

What does code do?

Driver Control

- Code that links the robot to another piece of technology that can control it. For us, this will be a controller.
- Allows that controller to manipulate the robot using tasks.

Autonomous Routine

- The robot moves on its own without human input.

Today's Goals

- + Day 3 Review
- + Finish Building
- + Learn Code
- + Break Time!
- + Game / Interview
